

The Oval house will require a hardstanding base no less than 210cm wide by 140cm. This can be made from concrete or a hardcore and slab traditional patio style base.

If you already have a level patio area of slab or decking then the Ovalhouse can be installed directly onto this.

Allow an area of 300cm wide by 250cm for the overall building size

Electrical Installation

WARNING: Any electrical installation should be carried out by a qualified electrician.

The Oval house is fitted with a small 16amp consumer unit which can be located in the rear cupboard of your building. The power will need to enter the building through a compression gland fitted approximately 50cm high to the rear middle of the building. The Ovalhouse will come complete with an IP44 16amp plug and socket ready for your cable to be fitted.

- Included
- 13amp Power Socket
- 700 watt heater
- 12v LED down lights
